# Barendra Biswal

## Full Stack Java Developer

I am a passionate professional transitioning into Java development. Proficient in leveraging Java, SQL, HTML, CSS, Bootstrap, and JavaScript to build dynamic, responsive web applications. Adept at integrating modern frameworks like ReactJS. I demonstrate a strong problem-solving mind-set and a passion for continuous learning and development. Ready to contribute innovative solutions and drive technological advancements in a fast-paced development environment.

## Experience

### 2022 - Present

Teleperformance Business Service India Ltd., Bangalore Hebbal.

#### Senior Desktop Support Engineer

- Provide advanced technical support for desktops, laptops, and mobile devices.
- Diagnose and resolve hardware and software issues, maintaining operating systems and applications.
- Manage user accounts in Active Directory and offer remote support as needed.
- Oversee local area network (LAN) management and troubleshoot connectivity issues.
- Lead IT projects, including system upgrades and new technology implementations, ensuring compliance with security protocols.
- Mentored junior staff, fostering a collaborative team environment and improving service delivery.

## Project work

#### DMART E-commerce Platform: (HTML, CSS & Bootstrap)

Built a responsive e-commerce platform with a user-friendly interface using HTML, CSS, and Bootstrap. Created adaptable product display pages and seamless navigation for enhanced user experience. Ensured mobile-first design and cross-browser compatibility with modern web standards. Integrated interactive elements using Bootstrap components for a polished look and functionality.

#### To-Do List Application: (HTML, CSS(Bootstrap) & Reactjs)

Created a dynamic to-do list application using ReactJS, enabling users to add, edit, and delete tasks, with data persistence via local storage.

#### Bookstore Analysis: (SQL)

Conducted comprehensive data analysis on bookstore inventory using SQL to identify sales trends, optimizing stock levels through detailed reporting.

#### Buy Phone using Java: (Java)

Built a user-friendly Java console application that simulates the process of purchasing a smartphone by guiding users through a series of choices, capturing their preferences for brand, model, storage, color, and selected additional specifications. The program provides real-time feedback on the device's specifications and final price.

## Certification

- Java Full-Stack Development at Besant Technologies, Bangalore.
- Certified MCC at Jetking, Bangalore
